EXECUTIVE INTELLIGENCE REVIEW BACKGROUND BRIEFING
THE HOT AUTUMN: THE KGB/NAZI INTERNATIONAL PLAN
TO SPLIT EUROPE FROM THE UNITED STATES

The integrity of the nations of Western Europe now stands threatened. Under the combined pressures of the "peace and disarmament movement" and its terrorist wing, the governments of Europe have the choice of preserving social and political order or succumbing and having their nations ripped apart in violence. Within the next months, under the rubric of "peace," and around the opposition to the NATO deployment of nuclear missiles to Europe, every Soviet-backed terrorist asset will be unleashed to push Europe into a state of ungovernability. The peace movement has called this campaign the "Hot Autumn."

On September 30, Helga Zepp-LaRouche, Chairwoman of the European Labor Party of West Germany, founder of the Club of Life and contributor to the Executive Intelligence Review will present a background briefing on the realities behind the "hot autumn" scenario, including the facts behind the terrorist activation:

* How the Soviet Union and its surrogates finance the peace movement to bring about the splitting of Western Europe from NATO and the U.S.

* The international operations of Libyan dictator Col. Muammar Khadafy who has set up "separatist" groups throughout Europe, the Mediterranean, and the United States to carry out terrorist operations. How Khadafy uses the Socialist International and the "peace movement," including the Green Party of West Germany to run destabilizations for the Soviet secret services, and one of its most important assets, the Nazi International based in Switzerland.

* How present U.S. policy, particularly the U.S. State Department's open support for the Green Party is aiding the threatened chaos in Western Europe.

Helga Zepp-LaRouche is an internationally known political leader in West Germany where she serves as Chairwoman of the European Labor Party. In 1981, as part of her decade-long efforts against the Club of Rome and the zero growth policies of the neo-Malthusians, Mrs. LaRouche founded the Club of Life, an international organization committed to building a new world economic order to preserve life. She is married to EIR founder Lyndon H. LaRouche Jr., the Advisory Board Chairman of the National Democratic Policy Committee and an internationally known economist.

About the current crisis being created in Western Europe, Mrs. LaRouche says:

"As the recent acts of violence against the United States personnel and installations in West Germany have demonstrated, a tremendous potential for violence and chaos exists at this time, and threatens the very existence of the United States-Western Europe alliance. This violence is being carried out by the so-called "peace movement" in Western Europe, but the aim is not simply violence, but to throw West Germany and all of Europe into a state of ungovernability."

"In recent public statements, Herbert Hellenbroich, the director of the Bundesverfassungsschutz (Agency for the Protection of the Constitution) has provided ample evidence that the so-called "peace movement" is financed and controlled by the East Bloc, which sees the opportunity for a strategy to split Europe from the United States."

"This is the strategy of the West German Green Party, the Communist Party of Germany, and their allies among the proponents of Pugwash in the West. Neo-Nazi networks are also directly involved in the Green Party, which is at the forefront of this developing fascist movement, and which is proved to have solid links to the dictator, Col. Muammar Khadafy of Libya."

"Anyone who claims that there is no 'hot autumn,' that the 'peace movement' does not represent a serious danger to NATO, to U.S. installations in Europe, and to the West German nation, is a danger to Western security and to all nation states existing in the republican tradition."

"There is tremendous lack of understanding of the situation in Europe. There is denial from official channels in the United States that the Soviet Union and its surrogates like the Swiss-centered Nazi International, and Col. Khadafy's Libya are unleashing a terrorist movement in West Germany aimed at making this nation ungovernable. Because of its policies, including giving encouragement to forces like the Green Party, the U.S. government has added to the potential for chaos. Unless the present policies are reversed, there will be chaos and Western Europe may be lost as a strategic ally."
